Policy Commander System Requirements and Supported Platforms

The information in this article applies to Policy Commander version 3.2.

	Policy Commander Console [1]	Policy Editor, Package Builder	New Boundary Channel Server[3]	New Boundary Client [2]
Operating System, 32- & 64-bit	Windows 10	Windows 10	Windows Server 2012 R2	Windows 10
	Windows 8, 8.1	Windows 8, 8.1	Windows Server 2012	Windows 8, 8.1
	Windows 7	Windows 7	Windows Server 2008 R2	Windows 7
	Windows Server 2012 R2	Windows Server 2012 R2	Windows Server 2008	Windows Server 2012 R2
	Windows Server 2012	Windows Server 2012		Windows Server 2012
	Windows Server 2008 R2	Windows Server 2008 R2		Windows Server 2008 R2
	Windows Server 2008	Windows Server 2008		Windows Server 2008
Database, 32- & 64-bit			MS SQL Server 2014	
			MS SQL Server 2014 Express	
			MS SQL Server 2012	
			MS SQL Server 2012 Express	
			MS SQL Server 2008 R2	
			MS SQL Server 2008 R2 Express	
			MS SQL Server 2008	
			MS SQL Server 2008 Express	
			MS SQL Server 2005	
			MS SQL Server 2005 Express	
Other components	.NET Framework 2.0		NET Framework 2.0	
Processor	Pentium or higher	Pentium or higher	Intel Core Duo or higher	Pentium or higher
RAM	1 GB	512 MB (32 bit)	1 GB (if you use Deploy only)	512 MB
		1 GB (64 bit)	2 GB (if you use Deploy & Asset Manager)	
Disk space for installed components	100 MB	40 MB	65 MB	6 MB
			Database: 4 GB	

	Installed disk space requirements	**Install file size**
SQL Server 2008 R2 Express4	350 MB	37 MB
MDAC 2.8	40 MB	5.5 MB
.NET Framework 2.0	150 MB	24 MB

These third-party items will be included in the standard installations as noted for the individual components above.

1devexpress and infragistics dlls are required to support reporting functions.

2capicom.dll is required to support Package authentication.

3Microsoft IIS 6 or IIS 7 must be installed on a Web server if you intend to use the NBTProxy Service to enable HTTP/HTTPS communication from the Policy Commander Console or client outside the network perimeter, to a Policy Commander Server inside the network perimeter. IIS installation and configuration is not part of the Policy Commander installation. Note: If you choose to install IIS 7, you must also install the IIS 6.0 management tools in order to install the NBTProxy Service. (Installing the IIS 6 management tools is a choice during installation of IIS 7.)

4The following Microsoft components are prerequisites to installing SQL Server 2008 R2 Express. They will NOT be downloaded during installation. If you plan to install SQL 2008 R2 Express as part of the Policy Commander installation (instead of using an existing SQL server), please install the prerequisites before starting the installation.

	Installed disk space requirements	**Installer file size**
Windows Installer 4.5	3 to 4.5 MB	70 to 125 MB
.NET Framework 3.5 SP1	500 MB	197 MB
